Date: 11/13/2015
Re: RFB2016-8 – 2015 or 2016 Ford Expedition 4x4 XL

The following questions have been submitted for RFB2016-8:

Question:

1. In the emergency response package, it states that Barrow County wishes to have two (2) lights mounted on the running board of each side of the vehicle. In looking at the vehicle specs, I don't see running boards as a requested option in the vehicle specifications. Where running boards inadvertently left off of the vehicle specs or is Barrow County requesting that the lights be mounted where the running boards would normally be?

Response:

If running boards are not included as manufacturer's standard equipment, then please make sure running boards are provided for in your bid price. The lights should be placed above the running boards.

2. For the graphics package, is Barrow County requesting 3M Diamond Grade vinyl for the chevrons on the rear of the vehicle (this would be identical to the chevrons on the rear of the new Dodge 5500 ambulances that Barrow County has, or does Barrow County just want the chevron pattern printed on regular vinyl? (This would be like the chevrons that are on the sprinter ambulances that Barrow County has.)

Response:

3M Diamond Grade
